Agentic Frameworks:
---
A framework gives us a ready-made structure and useful components, so that we can concentrate on building our actual AI application.

Without framework = More work from the scratch
With framework = Ready Foundation + Faster development

2 types of frameworks
1. Code Based Frameworks
2. No/Low Code Frameworks/Platform automation

1. Code Based Frameworks:
---
1. Agno --->Fast and Lightweight --->Very easy
2. LangChain --->Foundation Library --->Medium
3. LangGraph --->For stateful and Complex Workflows build on top of Langchain --->Medium
4. CrewAI --->Specialized for Multi-agent applications -->Easy
5. Google ADK --->Specialized if you are already using google products like GCP and Gemini -->Medium
6. OpenAI SDK --->Specialized if you are already using OpenAI products --->Medium

2. No code/Low code Frameworks:
---
1. n8n
2. Make
etc
